Government Income Exceeds Cost

VSI Facility Use Accomplishments

- **Government Revenues**

- CY 2002 \$2.10M (Actual)
- CY 2003 \$2.25M (Actual)

- **Zero Cost Army Facility**

- Maintenance of “Y” Line
(Laid away for Artillery Shell
Mobilization)

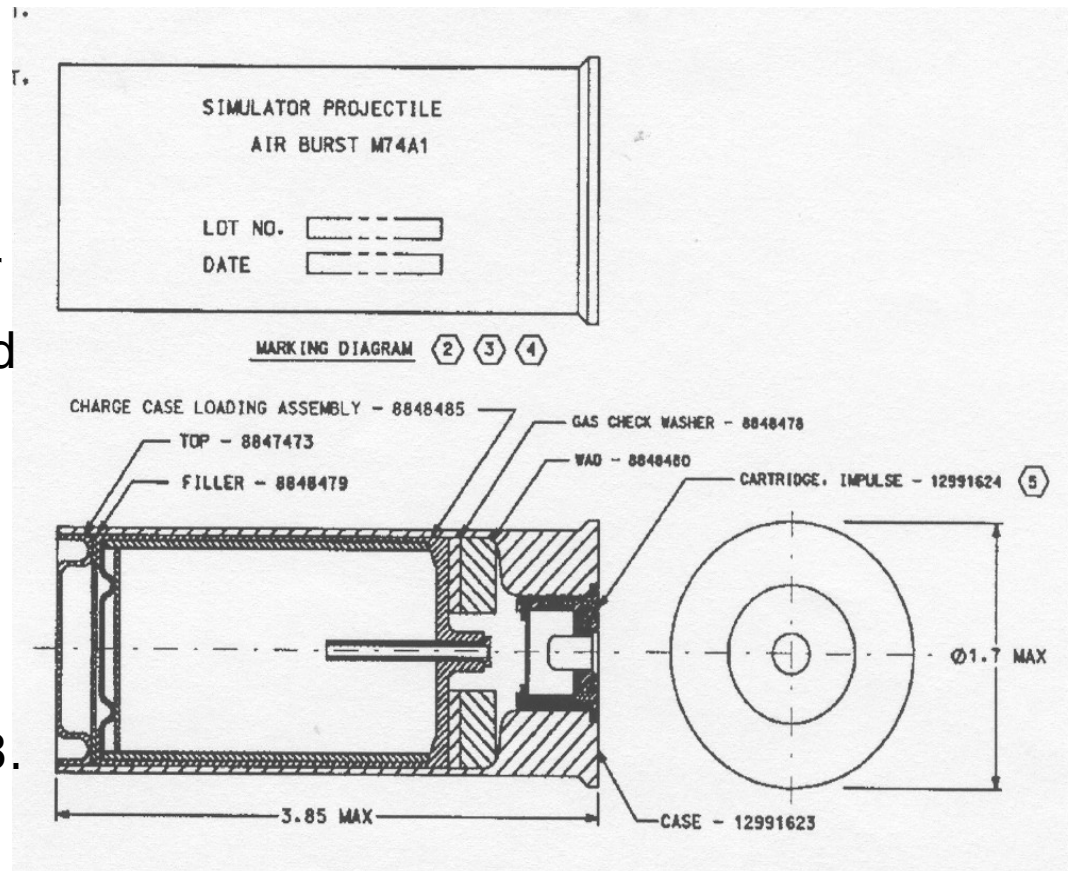

- **400 Jobs - \$12M in Tenant Payroll**

M74A1 Simulator

This newly redesigned simulator simulates the air burst of artillery fire for training of troops. It is fired from a M8 Signal Pistol.

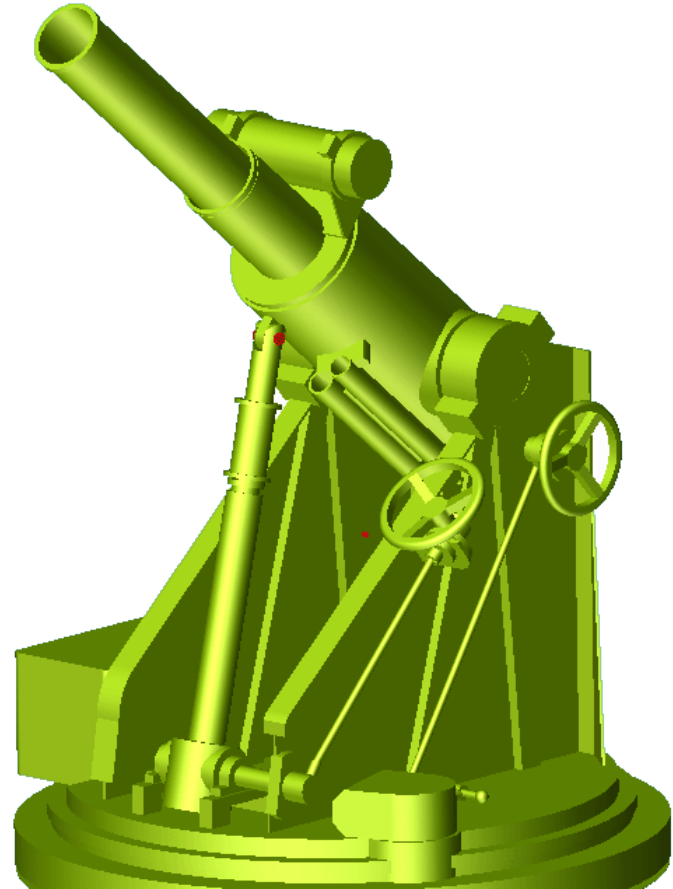

The US Army awarded VSI contract 30 April, 2003.

Keshet 120mm Mortar System

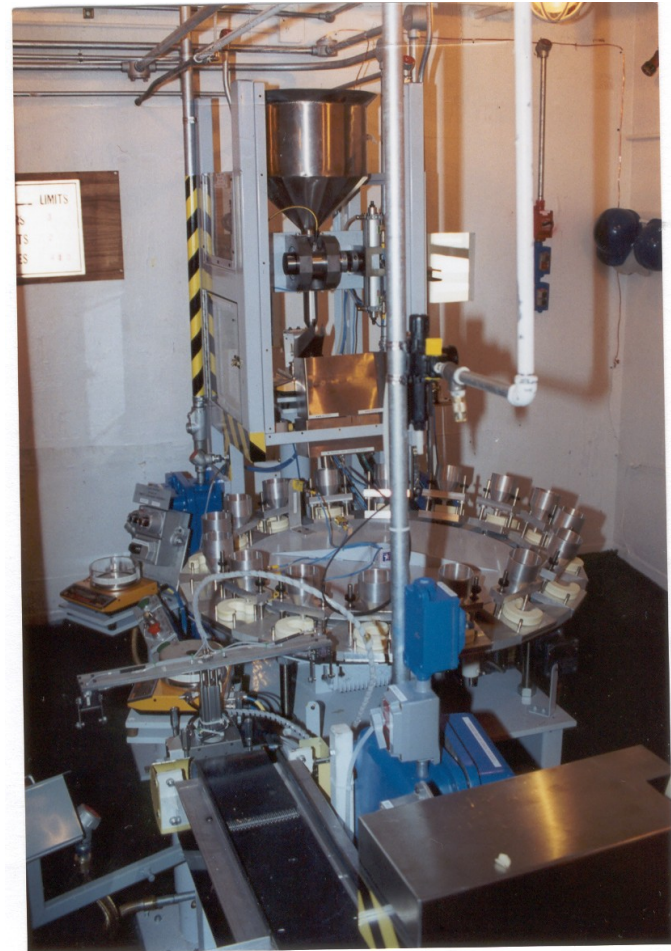

The 120mm Vehicle Mounted Mortar System is one of VSI's largest Systems contracts to date. Vehicle modification, weapon assembly and integration will be accomplished at LAAAP. The end user will be the Israeli Defense Forces. This program was won through the use of Foreign Military Funds.

60mm, 81mm and 120mm Mortar Increment Loading

VSI currently loads 60mm M235 Mortar Increment at Radford Army Ammunition Plant. Capabilities at Radford extend from 60mm through to 120mm mortars. Pictured here is automated loading station.
